PROFESSIONAL EXPERIENCE

Freelance Full-Stack Application Development

Sept 2021 - Present

- Developed back-end and front-end solutions to create replicas of well-known apps like Twitter and Tinder.
- Utilized JavaScript technologies for seamless integration and functionality.
- Employed Jest to test builds, ensuring robust and reliable code.
- Ensured responsive design and scalability

Haply Robotics

June 2022 - Feb 2024

- Collaborated with a senior developer to create their interactive web platform from scratch.
- Designed and implemented various pages showcasing the company's products, use cases, and a developer hub.
- Ensured full localization and responsiveness for both desktop and mobile platforms.
- Created a user-friendly and intuitive design.
- Utilized technologies including GatsbyJS, NodeJS, and Contentful CMS for efficient content management.
- Maintained comprehensive and clear documentation to support development processes and facilitate team collaboration**.**

EDUCATION

University of Concordia

Full-Stack Web Development Diploma
- Front-End (React/Redux)
- Back-End (Node/Express) / MongoDB

ADDITIONAL INFORMATION

- Languages: English, French (comprehension)
- I am a dedicated and energetic individual with a passion for tackling technical challenges. As a developer, my primary goal is to craft applications with clean, user-centric code that prioritizes efficiency and adheres to web accessibility standards, all while maintaining a visually appealing design.
- Beyond coding, I enjoy making music, biking, gardening, and hairdressing.
